

Together we make a mark

White & Case represents a tempting proposition for starting and developing a career at the top end of the business world. The work is cutting edge, the training is excellent, the rewards are first class and an attractive working environment is guaranteed.

As a leading global law firm with lawyers in 45 offices across 31 countries, White & Case provides counsel and representation in virtually every area of law that affects cross-border business, including transactions, arbitration and litigation. Whether in established or emerging markets, our hallmark is a complete dedication to meeting the business priorities and legal needs of our clients.

The firm's Brussels office is home to our EU law practice (with particular focus on competition law), and our Belgian and Luxembourg Transactional practice (Corporate M&A, Private Equity, Tax, Debt Finance and Capital Markets, Dispute Resolution, Financial Restructuring and Insolvency) which has an increasingly leading role.

What we offer

What really matters at White & Case is the cutting edge work you will be involved in. We offer a real team-work environment in a young, open and friendly atmosphere. You will have a role to play from day one at the core of the matter you work on, interacting directly with other colleagues and with clients. Your contribution will be seen, heard and relied upon.

You will be trained and supported in accordance with your specific requirements. We can also offer our associates overseas secondments in one of our offices throughout the world.

Our compensation package adds even more to the attractions of joining. The sometimes demanding work load and level of commitment in our view justify a package of compensation and additional benefits that are commensurate with the requirements of the work.

What we ask for

We recruit from all walks of life, from different national and cultural backgrounds, and with widely varying personalities. We seek intelligence and academic excellence, but the way you think and your strength of character are also crucial. Rapid analysis, motivation, creativity, team spirit, lateral thinking and pragmatism are other key qualities that we actively look for.

For our EU practice, we seek lawyers who have an excellent command of English, both written and oral, since English is the working language of the practice. Any additional languages are an advantage. We also require either a post-graduate qualification in EU law or experience working within a competition authority or a European institution.

For our Belgian and Luxembourg Transactional practice, we look for smart and confident lawyers with either Dutch or French as their mother tongue together with an excellent command of both English and the second Belgian national language. In addition to first-rate academic results, a post-graduate qualification gained abroad is an extra.
